

# Uninsulated Human Remains Transfer Container

NSN Number: 9930-00-823-9805 · Skydyne Part Number: 75232-001

The uninsulated HRTC is the original Vietnam era container used to transfer human remains. The uninsulated HRTC has been used by the Department of Defense and the United Nations in order to return fallen personnel back to their home country for a respectful burial. A new insulated version of this transfer container is also available for purchase, manufactured with better interior temperature control and field-replaceable hardware.

## Product Specifications:

- Dimensions: 88.25"L x 28.25"W x 17.6"H NOM
- Weight: Approx. 120 lbs.
- Construction: Aluminum .090 thick
- Material Finish: Anodized per MIL-A-8625 Type II Class 1
- Stiffening Ribs: Now Embossed/Stamped-In
- Handles: Stainless Steel/Aluminum Handle with Quiet-Close Rubber Bail, Stainless Steel Springs
- Clamps: Zinc Plated Steel, Spring Loaded
- Pressure Relief Valve
- Document Tube
- Pressure Relief Valve
- Interior Nylon Straps, Stainless D-Rings
- Head Block
- Air and Water Tight
- Stackable
